142			Bright Ideas for Learning	other book information			

Icons

Positioned in the upper right corner of each art activity page are icons which help the parent, teacher, or young artist select a particular project as to any of the following:

EXPERIENCE LEVEL

Assists in choosing, not limiting, choices of art experiences, with stars to indicate difficulty, and if adult supervision may be helpful.

EASY-BEGINNING
artists with little art experience

MODERATE-INTERMEDIATE
artists with some art experience and skill

INVOLVED-EXPERIENCED
artists with a variety of art experiences and practice

Age and skill do not necessarily go hand and hand. Therefore, the "experience icon" flags the projects most appropriate for new or beginning-level artists, mid-level artists with some experience, or advanced-level artists with greater experience who work more independently. However, all children can explore all projects whether the skill level matches their own or not - they may simply need a little more time to work or extra help with difficult steps. And remember, most experienced artists will also enjoy the easier levels, too.

ARTIST STYLE

Great artists from the past and present are often grouped into descriptive movements, styles, or eras. These are described in more detail in Chapter 6, under Great Art Words p.132-138. Some artists are found grouped under more than one style and still others are difficult to place in any one particular style. The more that artists and their techniques are explored, the easier it is to see how they fit into categories. Don't expect to know this all at once! It can take years of enjoyment, discovery, and study. For now, they are presented for the curious-minded who wish to know more and to help categorize the unique styles of each great artist.

ART TECHNIQUE

Shows what art medium or technique is utilized in the project.
